Who We Are

Barnes, Ferland and Associates, Inc. (BFA Environmental) is an environmental/utility engineering, hydrogeological consulting, surveying and mapping firm that specializes in natural resource management, permitting and design solutions. Services include solid and hazardous waste management; hydrogeological and wellfield development; environmental and contamination assessment; disaster debris management; water resources management and permitting. We also specialize in water, wastewater and reuse master planning. BFA provides our clients with comprehensive services related to utility coordination, survey, subsurface, exploration, protection and utility relocation of existing utilities located within State, County and City rights-of-way.

BFA is a Florida firm with its main headquarters in Orlando, Florida and satellite offices in Miami, Florida, West Palm Beach, Florida and New Orleans, Louisiana. BFA was established in 1994 and has principals and senior staff who are all registered professional engineers, scientists and/or land surveyors. BFA is a certified minority/disadvantaged business with numerous state and federal entities.

In an effort to help build capacity and resiliency in the vulnerable communities we serve, BFA also offers environmental workforce development and job training to at-risk young adults, including providing OSHA Construction Safety and Hazardous Waste Operations Certifications

Environmental Contamination

- ✦ ASTM Environmental Site Assessments
- ✦ Remedial Action Plans/Reports
- ✦ Environmental Risk Impact Assessments
- ✦ Environmental Compliance

Hydrology & Hydraulics

- ✦ Flow Rating Analysis
- ✦ Stream Gauging Assistance
- ✦ Hydro-meteorological Data Processing
- ✦ QA/QC on Hydro-Meteorological Data

Utilities Engineering & Management

- ✦ Transmission and Force Main Design
- ✦ Water, Wastewater and Reclaimed Master Plans
- ✦ Hydraulic Modeling Analysis
- ✦ High Service Pumping and Distribution

Debris Removal Management

- ✦ Quality Assurance Monitoring
- ✦ Debris Removal & Reduction Activities
- ✦ Identify Cumulative Quality of Debris Hauled
- ✦ Determine Accurate Load Capacities per Trailer

Groundwater & Natural Resources

- ✦ Hydrogeological and Natural Resources Evaluation
- ✦ Ecosystem Restoration
- ✦ Environmental and Water Use Permitting
- ✦ Design of Production, Test and Monitor Wells

Surveying & Mapping

- ✦ Subsurface Utility Location and Mapping
- ✦ Construction Staking
- ✦ Hydro-graphic Surveys
- ✦ Platting & Land Development Surveys

Solid Waste Management

- ✦ Solid Waste Management Master Planning
- ✦ Facility Closure and Monitoring
- ✦ Equipment & Vendor Procurement
- ✦ Landfill Gas Recovery Facility Design

Environmental Workforce/Capacity Building

- ✦ OSHA Construction Safety
- ✦ OSHA HAZWOPER
- ✦ Ecosystem Restoration and Monitoring
- ✦ Water and Wastewater Operations
